

# Safend Auditor, Knowing is Controlling

## If you don't see it, it can hurt you

Silently tracking your network's endpoints, Safend Auditor displays a real time picture on your organization's information security. Running over the computers on your network, the clientless Auditor identifies and reports all USB, FireWire, PCMCIA, PCI, internal storage usage and WiFi connections in exportable graphical reports. Comprehensively displaying complex current and historical information, Auditor reports can be further manipulated to provide administrators the knowledge they need to create and enforced companywide security policies. Part of Safend Data Protection Suite (DPS), Auditor searches for information according to Microsoft Active Directory, IP Range and Computer Name and is successfully integrated into Safend Protector. Having the capacity to run on up to 60,000 computers, Auditor is already used as part of Safend security solutions in different market sectors.

### Comprehensive Endpoint Visibility

#### Safend DPS, the Data Protection Suite

One DPS suite, one DPS agent

**Protector:**  
controlling port  
and device endpoints  
and media encryption

**Encryptor:**  
transparent encryption  
on laptops and PCs

**Inspector:**  
inspects, classifies and  
blocks sensitive data leakage

**Discoverer:**  
locates and maps  
sensitive data at rest

**Auditor:**  
immediate risk detection  
on WiFi ports/devices  
connected to endpoints

**Reporter:**  
regulatory compliance  
reports and security  
log summaries

## Clientless, Silent Monitoring

- Identification of USB, FireWire, PCMCIA, PCI, internal storage and WiFi connections usage on company endpoints
- Configuration of auditable computers and computer groups
- No requirement for endpoint client installations
- Strong reporting capabilities
- Quick auditing without interfering with network performance
- Different scan protocols
- Ability to define user-based permissions
- Variety of options to save and upload saved reports
- Runs as an offline tool or can be integrated into the Safend Management Server

## System Requirements

Windows 7 home / Enterprise / Ultimate 32-bit / 64-bit SP1

Windows 8 Pro / Enterprise 32-bit / 64-bit

Windows 8.1 Pro / Enterprise 32-bit / 64-bit

Windows 10 Pro / Enterprise

## About Safend, a SuperCom Company

Safend are providers of security products designed to protect against corporate data loss via comprehensive data encryption, port control, device control and content inspection solutions.

With over 3,000 customers worldwide and 3 million licenses sold, Safend software is deployed by multi-national enterprises, government agencies, healthcare organizations and small to mid-sized companies across the globe.

Founded in 1988, SuperCom is a leading global provider of advanced tracking, identification and security solutions.

Working as partners and promoting transparency and ethical business practices with their investors and with over 3500 customers and 20 governments worldwide, SuperCom is a publicly traded company on NASDAQ National Market (SPCB).
