

Safend Inspector, inspection for protection

Filtering your information before it flows

The gatekeeper of your organization's private data, Safend Inspector filters sensitive information before it leaks out. Fully compliant with PCI, HIPAA and Basel-II, and part of Safend Protection Suite, the comprehensive network-agnostic Inspector enables cross-channel protection based on levelled information.

Featuring end-user information filtering questions, and blocking outgoing data when necessary, Inspector offers strong alerting and event management when detecting attempted data leakage.

Inspector checks both file content and metadata without preventing the natural flow of business. Controlling user access and activities, Inspector also enables classifying information for improved accuracy and defining level-based security policies.

Safend DPS, the Data Protection Suite

One DPS suite, one DPS agent

Protector:
controlling port
and device endpoints
and media encryption

Encryptor:
transparent encryption
on laptops and PCs

Inspector:
inspects, classifies and
blocks sensitive data leakage

Discoverer:
locates and maps
sensitive data at rest

Auditor:
immediate risk detection
on WiFi ports/devices
connected to endpoints

Reporter:
regulatory compliance
reports and security
log summaries

Inspector: control your data flow

- Integrates compulsory network-agnostic information security policies
- Enables definition of data classification and controlled channels
- Built-in security policies complying with most regulatory requirements such as PCI, HIPAA and Basel-II
- Generation of comprehensive logs and reports on data leakage events
- Multi-tiered anti-tampering capabilities for tracking tampering attempts

Controlled Channels

- Email
 - Web HTTP/S
 - FTP
 - Network printers
 - Shared files
 - Cloud storage solutions
- Certifications
- Common criteria EAL2 certified
 - FIPS 140-2 validated
- System Requirements – Agent
- Windows Vista (x32 and x64)
 - Windows 7 (x32 and x64)
 - Windows 8 (x32 and x64)
- System Requirements – Server
- Windows 2008 (R1 and R2)
 - Windows 2012 server

About Safend, a SuperCom Company

Safend are providers of security products designed to protect against corporate data loss via comprehensive data encryption, port control, device control and content inspection solutions.

With over 3,000 customers worldwide and 3 million licenses sold, Safend software is deployed by multi-national enterprises, government agencies, healthcare organizations and small to mid-sized companies across the globe.

Founded in 1988, SuperCom is a leading global provider of advanced tracking, identification and security solutions. Working as partners and promoting transparency and ethical business practices with their investors and with over 3500 customers and 20 governments worldwide, SuperCom is a publicly traded company on NASDAQ National Market (SPCB).
