

Safend Protector, more than device control

Port and device control with removable media encryption

Safend Protector is the industry's most comprehensive, secure, easy-to-use endpoint data protection and data leakage prevention solution – controlling every endpoint and every device, over every interface.

Preventing internal data leakage, Protector has the strength and flexibility to control your port and device endpoints and to protect your company against external and internal threats.

An intuitive product with strong rule-based file encryption capabilities and built in compliance policies, Protector averts data and financial loss related to inappropriate use of smartphones, CD/DVD, external hard drives and removable storage devices.

Stop Data Leakage through Physical Ports and Removable Media with One Centrally Managed Console.

Safend Protector detects and allows the restriction of devices by device type, model, or even specific device serial number.

For storage devices, Protector allows security administrators to either block all storage devices completely, permit read-only or encrypt all data. It also monitors, blocks, and logs all files that are downloaded to or read from these devices. WiFi controls are based on MAC address, SSID, or network security level.

Safend DPS, the Data Protection Suite

One DPS suite, one DPS agent

Protector:
controlling port
and device endpoints
and media encryption

Encryptor:
transparent encryption
on laptops and PCs

Inspector:
inspects, classifies and
blocks sensitive data leakage

Discoverer:
locates and maps
sensitive data at rest

Auditor:
immediate risk detection
on WiFi ports/devices
connected to endpoints

Reporter:
regulatory compliance
reports and security
log summaries

Containing threats, protecting data, more productivity

- Granular control, detecting and restricting devices according to device type, model or unique serial number
- Encryption of in-motion corporate data on removable storage devices, external hard drives and CD/DVDs
- Tracking file transfer to/from Safend encrypted devices or non-corporate computers via removable storage devices
- Built-in compliance, detailed configuration of security policies mapped to specific regulatory standards such as PCI, HIPAA and SOX
- Granular WiFi control according to MAC address, SSID or network security level
- Anti-bridging, preventing hybrid network bridging by blocking WiFi, Bluetooth, modems or IrDA on computers connected to a wired company LAN
- Triggered virus scans via third party anti-virus applications to prevent malware and viruses via removable storage devices
- Flexible and intuitive management with automatic data synchronization with Active Directory

Supported by Safend Protector

Protected Physical Interfaces

- USB
- FireWire
- PCMCIA
- Secure Digital (SD)
- eSATA
- Parallel
- Serial modem

Certifications

- Common criteria EAL2 certified
- FIPS 140-2 validated

System Requirements – Agent

- Windows 7 Home / Enterprise / Ultimate
- 32-bit / 64-bit SP1
- Windows 8 Pro / Enterprise 32-bit / 64-bit
- Windows 8.1 Pro / Enterprise 32-bit / 64-bit
- Windows 10 Pro / Enterprise

System Requirements – Server

- Windows 2008 SP1 Server
- Windows 2008 R2 Server SP1
- Windows 2012 Server
- Windows 2012 R2 Server

Protected Storage Devices

- Removable storage devices
- External hard drives
- CD / DVD, floppy and tape drives

Protected Wireless Interfaces

- WiFi
- Bluetooth
- Infra Red

About Safend, a SuperCom Company

Safend is a leading provider of security products designed to protect against corporate data loss via comprehensive data encryption, port control, device control and content inspection solutions. With over 3,000 customers worldwide and 3 million licenses sold, Safend software is deployed by multi-national enterprises, government agencies, healthcare organizations and small to mid-sized companies across the globe.

Founded in 1988, SuperCom is a global provider of traditional and digital identity solutions, providing advanced safety, identification, tracking and security products to governments, private and public organizations throughout the world. SuperCom is a publicly traded company on NASDAQ National Market (SPCB).
